

GENERAL DESCRIPTION OF THE PROJECT

The scope of the project is to implement a fully-operational Operational Center Unit (OCU) including customized S.I.R.A.T. (SELEC Intelligence Reporting Application Tool¹) in SELEC Headquarters, integrated with the National Focal Points that will consist of the following milestone components and competences:

- a. High level design of the OCU concept which will include:
 - i. OCU office design, organization and architecture respecting all legal and operational requested certifications;
 - ii. Physical security and control access and solution;
 - iii. Furniture and fitting design, organization concept and space transformation;
 - iv. Video wall configuration and architecture, and integration solution into the command and control (C2) OCU;
 - v. Workspaces for the dispatching staff including project management team;
 - vi. C2 operational platform including Geographic Information System (GIS), situational awareness, incident management, reporting, working procedure;
 - vii. Integration and communication with National Focal Points including voice and video communication solutions;
 - viii. Crisis steering committee room and integration into the OCU including voice, data and video communication.

- b. High level configuration and architecture design implementation for the new OCU network including services convergences solution with the existing SELEC network:
 - i. Switch and routing data network;
 - ii. Voice and Data Communication network;
 - iii. C2 portal server, data storage and back up concept and solution;
 - iv. Information security and physical security solution for OCU concept;
 - v. Fitting, cabling and accessories and implementation for low and strong cabling infrastructure.

- c. Data analytics law enforcement intelligence application including collection information tool and document management solution implementation
 - i. Law enforcement intelligence data analytic portal and infrastructure concept;

¹ **Customized S.I.R.A.T. (SELEC Intelligence Reporting Application Tool)** will ensure a fast collection, analysis and exchange of strategic and operational information among Case Officers, National Focal Points, SELEC Liaison Officers, SELEC analysts.

- A. Case management platform. Includes: Intranet/Extranet web platform that includes:
 - Data acquisition & Management system Unlimited licenses
 - Reporting & BI
 - GIS Integration&Management
 - installation and customization
 - support
- B. Information flow includes:
 - 50 named user license
 - Reporting module
 - OCR Module
 - installation and customization

- ii. Law enforcement data analytic application implementation;
 - iii. Collection information tool and document management implementation, and backup implementation, security and management;
 - iv. Collection information tool and document management implementation, and integration within OCU concept;
 - v. Law enforcement intelligence data analytics application hand over process and user certificated training.
- d. Law enforcement specialized virtual reality training room including concept design, implementation and training.
